

Barcode Treasure Hunt

Answer these clues and write down the first letter or number from the answer in the password box below. You may need to use Google to help with some of the clues.

Clue 1:

Clue 2:

Clue 3:

Clue 4:

Clue 5:

Clue 6:

Clue 7:

Before you start!

1. Open Word and plug your barcode scanner into your computer.
2. When you scan a barcode, the decoded text will appear in Word.
3. Some answers will need converting into denary.

Hints...

- Remember the *ASCII converter* and the *ASCII table*? You may need them!
- *Hexadecimal numbers* can start with the *prefix "0x"*.
- Morse Code is similar to binary but uses dots (*dit*) and dashes (*dah*) instead of 1s and 0s.
- Did you know that the *first programmer* may have been a young woman?
- Good passwords are NOT easy to guess!
- The barcode format on this sheet is called *Code 128*. This refers to the number of *ASCII characters* that can be encoded in this format.
